CMS National Coverage Policy
Indications and Limitations of Coverage and/or Medical Necessity

Medicare coverage of hospice care depends upon a physician's certification of an individual's prognosis of a life expectancy of six months or less, if the terminal illness runs its normal course. Recognizing that determination of life expectancy during the course of a terminal illness is difficult, this intermediary has established medical criteria for determining prognosis for non-cancer diagnoses. These criteria form a reasonable approach to the determination of life expectancy based on available research, and may be revised, as more research is available. Coverage of hospice care for patients not meeting the criteria in this policy may be denied. However, some patients may not meet the criteria, yet still be appropriate for hospice care, because of other comorbidities or rapid decline. Coverage for these patients may be approved on an individual consideration basis.

Patients will be considered to be in the terminal stage of their illness (life expectancy of six months or less) if they meet the following criteria:

**HIV Disease** (1 and 2 must be present; factors from 3 will add supporting documentation)

1. CD4+ Count <25 cells/mcL or persistent viral load >100,000 copies/ml, plus **one** of the following:
   a. CNS lymphoma
   b. Untreated, or not responsive to treatment, wasting (loss of 33% lean body mass)
   c. Mycobacterium avium complex (MAC) bacteremia, untreated, unresponsive to treatment, or treatment refused
   d. Progressive multifocal leukoencephalopathy
   e. Systemic lymphoma, with advanced HIV disease and partial response to chemotherapy
   f. Visceral Kaposi's sarcoma unresponsive to therapy
   g. Renal failure in the absence of dialysis
   h. Cryptosporidium infection
   i. Toxoplasmosis, unresponsive to therapy

2. Decreased performance status, as measured by the Karnofsky Performance Status (KPS) scale, of ≤50

3. Documentation of the following factors will support eligibility for hospice care:
   a. Chronic persistent diarrhea for one year
   b. Persistent serum albumin <2.5
   c. Concomitant, active substance abuse
   d. Age > 50 years
   e. Absence of antiretroviral, chemotherapeutic and prophylactic drug therapy related specifically to HIV
disease

f. Advanced AIDS dementia complex
g. Toxoplasmosis
h. Congestive heart failure, symptomatic at rest

## Coding Information

**Bill Type Codes:**

Contractors may specify Bill Types to help providers identify those Bill Types typically used to report this service. Absence of a Bill Type does not guarantee that the policy does not apply to that Bill Type. Complete absence of all Bill Types indicates that coverage is not influenced by Bill Type and the policy should be assumed to apply equally to all claims.

</tr>
<tr>
<td>082x</td>
<td>Hospice (hospital based)</td>
</tr>
</tbody>
</table>

**Revenue Codes:**

Contractors may specify Revenue Codes to help providers identify those Revenue Codes typically used to report this service. In most instances Revenue Codes are purely advisory; unless specified in the policy services reported under other Revenue Codes are equally subject to this coverage determination. Complete absence of all Revenue Codes indicates that coverage is not influenced by Revenue Code and the policy should be assumed to apply equally to all Revenue Codes.

ICD-9 Codes that DO NOT Support Medical Necessity Asterisk Explanation

Diagnoses that DO NOT Support Medical Necessity

General Information

Documentations Requirement
1. Documentation supporting the medical necessity should be legible, maintained in the patient’s medical record, and must be made available to the Intermediary upon request.

2. Documentation certifying terminal status must contain enough information to confirm terminal status upon review. Documentation meeting the criteria outlined under “Indications and Limitations of Coverage and/or Medical Necessity” section of this policy would meet this requirement.

3. If the patient does not meet the criteria outlined under “Indications and Limitations of Coverage and/or Medical Necessity” section of this policy, yet is deemed appropriate for hospice care, sufficient documentation of the patient’s condition that justifies terminal status, in the absence of meeting the above criteria, would be necessary.

4. Recertification for hospice care requires that the same standards be met as for initial certification.
